ISIN code: (C/D) FR0010655761

This Fund is managed by Amundi Asset Management, an Amundi company

Objectives and Investment Policy

Classification by the French Market Regulator (AMF): International equities.

By subscribing to AMUNDI ETF MSCI UK UCITS ETF, you are investing in a Fund that is managed passively, the objective of which is to replicate, as closely as possible, the performance of the MSCI UK Index ("the Index"), whether the Index rises or falls. The target for maximum tracking error between changes in the Fund's NAV and that of the Index is 2%.

The euro-denominated Index, net dividends reinvested (dividends net of tax paid by the equities comprising the index are included in the calculation of the index), is calculated and published by the index provider MSCI.

You are exposed to the exchange rate risk between the currency in which the stocks in the index is denominated and the currency of the Fund.

The equities in the MSCI UK Index are leading securities traded in the UK markets.

More information about the composition of the index and its operating rules are available in the prospectus and at: [msci.com](https://www.msci.com).

The Index is available via Reuters (.dMIGB00000NEU) and Bloomberg (MSDEUKN).

To track the Index, the UCITS swaps the performance of the assets held by the Fund for that of the Index through a derivative contract or total return swap (a "TRS" derivative instrument) (swap-based replication of the Index).

The Fund's net profit and net realised capital gains are reinvested or redistributed each year at the discretion of the Management Company.

You may resell your units during the trading hours of the various stock exchanges, provided that the Market Makers can maintain market liquidity.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
