ARK ARTIFICIAL INTELLIGENCE & ROBOTICS UCITS ETF

Share Class: USD ACCUMULATING ETF

ISIN: IE0003A512E4

The Fund is a sub-fund of ARK Invest UCITS ICAV (the "ICAV")

The Fund is managed by IQ EQ Fund Management (Ireland) Limited (the "Manager") of the IQ EQ group of companies

Objectives and Investment Policy

The ARK Artificial Intelligence & Robotics UCITS ETF (the "Fund") is actively managed and invests primarily in global equity securities of artificial intelligence, autonomous technology and robotics companies that are relevant to the Fund's investment theme of "disruptive innovation", defined as the introduction of a technologically enabled new product or service that potentially changes the way the world works. These are companies that are expected to focus on and benefit from the development of new products or services, technological improvements and advancements in scientific research related to, among other things, disruptive innovation in artificial intelligence, automation and manufacturing, transportation, energy, and materials.

The investment manager uses both "top down" approaches (thematic research sizing the potential total available market for each technology, and identifying the prime leaders, enablers and beneficiaries of the innovation) and "bottom up" approaches (valuation, fundamentals and quantitative measures relating to individual companies) to select companies. The "top down" approach explicitly selects for technologies that the Investment Manager anticipates will make a meaningful contribution to at least two of the United Nations Sustainable Development Goals.

The "bottom up" approach to company selection integrates ESG considerations such as business involvement, violations of international norms and standards and an assessment of controversies, environmental and social risks and governance.

DIVIDEND POLICY. This Share Class does not intend to pay dividends. Any income which may result from the Fund's investments will be re-invested into the Fund.

DEALING. Shares in this Share Class (the "Shares") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the ICAV. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on <https://arkeurope.com/>

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is rated 7 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund's future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean "risk free".

The Fund is subject to the risks associated with technology-focused companies including the risk of: (1) failure of new technologies and solutions to replace existing ones or to be approved by governments/regulators or to achieve their aim; (2) the failure of individual companies to successfully capitalise on such new technologies and reach profitability; (3) competition, including rapid developments in competitive technologies (which may leave a company's products out-of-date); (4) government intervention or excessive regulation; and (5) legal attacks from competitors

Other: (1) The Fund also invests in small publicly-traded companies which may be less mature and more vulnerable to adverse business or economic events and greater share price changes than larger companies, the wider technology sector or stock market. (2) The Fund invests in global equity securities and there is a risk of loss arising from exchange rate fluctuations or exchange control regulations. (3) The ICAV's depositary or other service providers may go bankrupt and fail to return money or property belonging to the Fund. (4) It may not always be possible to buy and sell the Fund's shares on a stock exchange or at prices closely reflecting the Fund's Net Asset Value. (5) There is no capital guarantee or protection on the value of the Fund and investors can lose all the capital invested in the Fund.
