WisdomTree UK Quality Dividend Growth UCITS ETF - GBP

ISIN: IE0003UH9270

a share class of WisdomTree UK Quality Dividend Growth UCITS ETF (the "Fund")

which is a sub-fund of WisdomTree Issuer ICAV. Managed by WisdomTree Management Limited.

Objectives and Investment Policy

- The Fund seeks to track the price and yield performance, before fees and expenses of the WisdomTree UK Quality Dividend Growth Index (the "Index").
- The Index aims to deliver an exposure to high quality, dividend growing companies from the UK markets.
- The Index is rules based, fundamentally weighted and is comprised of high quality dividend paying companies from UK markets, risk filtered using a composite risk score ("CRS") screening, which is made up of two factors (quality and momentum), each carrying an equal weighting.
- To be included in the Index, companies must meet certain risk management criteria, as well as minimum liquidity requirements.
- The index excludes companies based on environmental, social and governance criteria.
- The Index on rebalancing date is comprised of the top 100 companies in the eligible universe based on the combination of growth and quality characteristics. The component companies are then weighted annually in the Index based on dividends paid over the prior annual cycle. Companies that pay more dividends are more heavily weighted.
- The Index is rebalanced on an annual basis.
- In order to achieve its objective, the Fund will employ a "passive management" (or indexing) investment approach and will invest in a portfolio of equity securities that so far as possible and practicable consists of a representative sample of the component securities of the Index.
- As it may be difficult, expensive or otherwise inefficient to purchase all the securities in the Index, the Fund may also hold shares or other securities which produce a similar investment return to securities in the Index or may invest in collective investment schemes.
- The Fund may enter into repurchase/reverse repurchase agreements and stock lending arrangements solely for the purposes of efficient portfolio management, subject to the conditions and within the limits set out in the prospectus for WisdomTree Issuer ICAV (the "Prospectus").
- Shares of the Fund ("Shares") are listed on one or more stock exchanges. Typically, only Authorised Participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.
- Distribution policy: Income received by the Fund's investments will normally be distributed Semi-annually in respect of the Shares of this class.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Currency: The base currency of the Fund is Sterling. The currency of denomination of this share class is Sterling.
- For full investment objectives and policy details, please refer to the supplement to the Prospectus for the Fund (the "Supplement").

Risk and Reward Profile

- The categorisation above is not guaranteed to remain unchanged and may shift over time.
- The lowest category (1) does not imply a risk-free investment.
- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The SRRRI categorisation above (5) is due to the nature of the Fund's investments and risk associated with those investments, including:
 - The value of underlying securities can be affected by daily financial market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
 - Investment risk may be concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
- Risks not covered by the indicator, but which are materially relevant to the Fund include:
 - Tracking error risk: The Fund's performance may not exactly

track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.

- There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.
- It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the Fund buys or sells securities may compare adversely to the price under normal market conditions
- Counterparty risk: The Fund is subject to the risk that third parties with which the Fund may transact may go bankrupt or fail to pay money due to the Fund or return property belonging to the Fund.
- For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and the Prospectus
