ISIN: IE000X59ZHE2

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of the Fund which aims to achieve a total return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the STOXX Global AI Infrastructure Index, the Fund's benchmark index ("Index")
- ▶ The Share Class, via the Fund, is passively managed and aims to invest in the equity securities that, so far as possible and practicable, make up the Index. The Index reflects the performance of a subset equity securities of eligible countries globally within the STOXX World AC All Cap Index. Companies included in the Index are expected to play a central role in the development and evolution of the building block components for artificial intelligence, such as semiconductors, cloud computing and big data technologies (the "AI Infrastructure Theme").
- ▶ The Index includes companies that meet the inclusion criteria defined by their patent and revenue exposure to the AI Infrastructure Theme. In addition, companies in the Index must be domiciled in an eligible country and meet criteria around daily trading volume and market capitalization as determined by the index provider.
- ▶ The Index excludes companies which are identified by the index provider as being involved in certain business lines/ activities, as outlined in the Benchmark Index and Investment Techniques section in the Fund's Prospectus.
- ▶ The Index is adjusted equally weighted and rebalances on an annual basis. At each rebalance, companies which are no longer eligible will be removed from the Index. On a quarterly basis, current constituents of the Index are screened for their involvement in severe ESG controversies and adherence to international norms and principles, and issuers which are no longer eligible will be removed at the relevant quarter.
- ▶ The Fund's investment in securities that make up the Index will, at the time of purchase, comply with the ESG requirements of the Index. Where securities no longer meet such requirements, the Fund may continue to hold them until they cease to form part of the Index and it is practicable to sell them.
- ▶ The Fund intends to replicate the Index by holding the equity securities which make up the Index, in similar proportions to it. The investment manager may use financial derivative instruments (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objectives.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ The Fund intends to replicate the Index by holding the equity securities which make up the Index, in similar proportions to it.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be accumulating shares (i.e. income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Companies in AI-related businesses will be subject to risks associated with developing technology and will face intense competition which may have an adverse effect on profit margins. It is likely that these companies will also rely heavily on Patents and other proprietary rights and any loss of, or limitation on their ability to enforce, such proprietary rights in the future could have a material adverse effect on their profitability. Certain AI technology features may also increase the risk of fraud or cyberattack.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund’s prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
