PIMCO

# PIMCO Sterling Short Maturity UCITS ETF

A sub-fund of PIMCO ETFs plc  
PIMCO Global Advisors (Ireland) Limited, part of Allianz, manages this fund.

ISIN: IE00B622SG73  
Share class: GBP Income

## Objectives and Investment Policy

**Objective** The fund aims to generate income while preserving and increasing the amount originally invested.

**Investment Policy** The fund will invest primarily in an actively managed diversified portfolio of UK Sterling-denominated fixed income securities of varying maturities including government bonds and securities issued or guaranteed by governments, their sub-divisions, agencies or instrumentalities, corporate debt securities and mortgage or other asset-backed securities. The fund may also hold securities that are priced in other currencies, with such securities generally hedged back to Sterling. The fund may seek to obtain market exposure to the securities in which it primarily invests by entering into a series of purchase and sale contracts or by using other investment techniques. The fund invests only in "investment grade" securities. "Investment grade" securities typically produce a lower level of income than "non-investment grade" securities and are also considered to be of lower risk.

The fund's weighted average maturity is not expected to exceed 3 years. The average portfolio duration of the fund will be up to one year based on the investment adviser's forecast for interest rates. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates.

The fund may use forwards or forward settling contracts. The return is linked to movements in the underlying assets.

The fund intends to measure its performance against the ICE BofAML Sterling government Bill Index (the "Index"). The fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the fund's securities may be components of and may have similar weightings to the Index. However the Index is not used to define the portfolio composition of the fund or as a performance target and the fund

may be wholly invested in securities which are not constituents of the Index.

The fund is an active ETF and will aim to meet its objectives and investment policy as outlined above and as further described in the prospectus.

**For full investment objectives and policy details please refer to the prospectus.**

**Distribution Policy** This share class pays out a distribution of any investment income generated by the fund. You may elect for this to be reinvested into the fund.

**Dealing Day** The fund's net asset value is calculated daily and the fund is open for redemptions on each business day banks are open in London. Please refer to the prospectus for further information. The fund shares are listed on one or more Stock Exchanges. As the fund is an exchange traded fund ("ETF"), in normal market conditions typically only authorised participants may subscribe or redeem shares directly with the fund. Other investors can buy or sell shares daily through an intermediary directly or on stock exchanges on which then shares are traded, i.e. on the secondary market. In exceptional circumstances, other investors will be permitted to redeem their shares directly from the Company in accordance with the redemption procedures set out in the prospectus, subject to applicable laws and any relevant charges.

**Fund's Base Currency** British Pounds

## Risk and Reward Profile

This rating is not a measure of the risk of capital loss, but a measure of the fund's price movement over time. This rating:

- is based on historical data, which may be comparative, and may not be representative of future rating.
  - as a result, this risk estimation may not be a reliable indicator of future risk and may be subject to change over time.
  - is classified in the category indicated above due to its past behaviour, which may be comparative. The lowest category does not mean risk free investment.
  - is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment.
- does not provide its investors with any guarantee on performance, nor on the performance of monies invested in it.

**Main risks not covered by the above indicator which could negatively affect the net asset value of the fund:**

**Counterparty Risk** Other financial institutions provide services such as safekeeping of assets or as a counterparty to financial contracts such as derivatives. The fund is exposed to the risk of bankruptcy, or other type of default of transaction counterparties.

**Credit and Default Risk** A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its

bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk.

**Derivatives and Counterparty Risk** The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations.

**Fixed Income Risk** There is a risk that the institution which issued the securities will fail, which would result in a loss of income to the fund. Fixed income values are likely to fall if interest rates rise.

**Risk of Using Derivatives** In order to reach its investment objective, the fund may use swaps, including futures and forwards. Such derivatives may result in gains or losses that are greater than the original amount invested.

**Interest Rate Risk** Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices).

**Mortgage Related and Other Asset Backed Securities Risks** Mortgage or asset backed securities are subject to similar risks as other fixed income securities, and may also be subject to prepayment risk and higher levels of credit and liquidity risk.

For more information on risks, please see the fund prospectus which is available at [www.pimco.com](http://www.pimco.com).

## Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

| One-off charges taken before or after you invest   |        |
|--|--------|
| Entry charge   | None * |
| Exit charge  | None * |
| This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out. |        |
| Charges taken from the fund over a year  |        |
| Ongoing charges  | 0.19%  |
| Charges taken from the fund under certain specific conditions  |        |
| Performance fee  | None   |

\*Because the fund is an ETF, investors will typically only be able to buy or sell shares in the secondary market. Secondary market investors may incur brokerage and / or transaction fees in connection with their dealings. Secondary market investors may also bear the costs of "bid-ask" spreads; meaning the difference between the prices at which shares can be bought and sold. You should discuss these fees and costs with your financial advisor or broker before you invest, as they may reduce the amount of your initial investment and the amount you receive on disposal.

Authorised Participants dealing directly with the Fund may pay an entry charge up to a maximum of 3% and an exit charge up to a maximum of 3%.

The entry charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial advisor.

The ongoing charges figure is based on expenses for the year ending 2025. This figure may vary from year to year.

The ongoing charges figure is inclusive of a fee waiver in the amount of 0.16% until 01 October 2029. However, the Directors in their discretion may determine to continue or reduce the fee waiver beyond 01 October 2029.

For more information on charges, please see the relevant charges section in the fund prospectus which is available at [www.pimco.com](http://www.pimco.com).
