JPMorgan ETFs (Ireland) ICAV

ISIN: IE00BD9MMG79

JPM GBP Ultra-Short Income UCITS ETF - GBP (dist)

a Share Class of JPMorgan ETFs (Ireland) ICAV – GBP Ultra-Short Income UCITS ETF. The management company is JPMorgan Asset Management (Europe) S.à r.l.

## Objectives and Investment Policy

**Investment Objective:** The Sub-Fund aims to provide current income while seeking to maintain a low volatility of principal.

**Investment Policy:** The Sub-Fund pursues an actively-managed investment strategy.

The Sub-Fund seeks to achieve its investment objective by primarily investing in investment grade, Pound Sterling-denominated, short term fixed, variable and floating rate debt securities.

The Sub-Fund will not seek to track the performance of the benchmark, rather the Sub-Fund will hold a portfolio of actively selected and managed investments. The benchmark has been included as a point of reference against which the performance of the Sub-Fund may be measured. The Sub-Fund will be managed without reference to its benchmark.

At least 51% of the Sub-Fund's assets are invested in issuers with positive environmental and/or social characteristics that follow good governance practices, as measured through the Investment Manager's proprietary environmental, social and governance ("ESG") scoring methodology and/or third party data. In addition, for some but not necessarily all issuers, the Sub-Fund incorporates a bespoke set of Employee Engagement and Diversity ("EE&D") data inputs, such as an issuer's gender breakdown, diversity programmes, ethnicity score and equal pay score into the investment process. The Sub-Fund invests at least 51% of those assets that have an EE&D rating in issuers scoring above a pre-defined threshold in relation to EE&D inputs. The Sub-Fund promotes environmental and/or social characteristics.

The Sub-Fund invests at least 10% of assets excluding cash, money market funds and derivatives for efficient portfolio management, in Sustainable Investments, as defined under SFDR, contributing to environmental or social objectives.

The Investment Manager evaluates and applies values and norms based screening to implement exclusions. To support this screening, the Investment Manager relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. This screening includes, for example, identifying issuers that are involved in the manufacturing of controversial weapons (such as cluster munitions, depleted uranium ammunition and amour or anti-personnel mines), thermal coal and tobacco among others. The list of screens applied that may result in exclusions can be found on the Website ([www.jpmmorganassetmanagement.ie](http://www.jpmmorganassetmanagement.ie)).

The Sub-Fund systematically includes ESG analysis in its investment decisions on at least 75% of non-investment grade securities and on at least 90% of investment grade securities purchased.

The Investment Manager allocates the Sub-Fund's assets among a range of market sectors. In buying and selling investments for the Sub-Fund, the Investment Manager looks for market sectors and individual securities that it believes will assist in delivering the Sub-Fund's investment objective by providing stable income and price appreciation.

The Sub-Fund will concentrate its investments in the banking industry and, under normal conditions, will invest more than 25% of its Net Asset Value in debt securities issued by companies which are in the banking industry. The Sub-Fund may, however, invest less than 25% of its Net Asset Value in this industry as a temporary defensive measure.

The Sub-Fund seeks to maintain a duration of one year or less. Duration is a measure of the price sensitivity of a debt security or a portfolio of debt securities to changes in relevant interest rates.

As part of its principal investment strategy and for temporary defensive purposes, any portion of the Sub-Fund's Net Asset Value may be invested in cash and cash equivalents.

The Sub-Fund may invest in instruments denominated in currencies other than GBP, however, any non-GBP exposure will be hedged into GBP.

The Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments.

The Sub-Fund seeks to assess the impact of ESG factors on the cash flows or risk profiles of many issuers in which it may invest, to identify issuers that it believes will be negatively impacted by such factors relative to other issuers. The Investment Manager focuses on key risk factors, including, accounting and tax policies, disclosure and investor communications, shareholder rights, remuneration and social and environmental factors, seeking to identify such negative outliers.

GBP is the base currency of the Sub-Fund.

## Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

**Why is this Share Class in this category?** This Share Class is classified in category 1 because its Net Asset Value has shown very low fluctuations historically.

### OTHER MATERIAL RISKS

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded.

- These risks are typically increased for below investment grade debt securities which may also be subject to higher volatility and lower liquidity than investment grade debt securities. The credit worthiness of unrated debt securities is not measured by reference to an independent credit rating agency.
- Asset-backed, collateralised loan obligations and mortgage-backed securities may be less liquid than other securities in which the Sub-Fund will invest, subject to adverse changes to interest rates and to the risk that the payment obligations relating to the underlying assets are not met.
  - The Sub-Fund may be concentrated in the banking industry and in the UK sectors, markets and/or currency. As a result, the Sub-Fund may be more volatile than more broadly diversified funds.
  - Exclusion of issuers that do not meet certain ESG criteria from the Sub-Fund's investment universe may cause the Sub-Fund to perform differently compared to similar funds that do not have such a policy.
  - Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that will be used to minimise the effect of currency fluctuations may not always be successful.
  - Further information about risks can be found in the "Risk Information" section of the Prospectus.
