L&G All Commodities UCITS ETF

Share Class USD Accumulating ETF - ISIN: IE00BF0BCP69. The Fund is a sub-fund of Legal & General UCITS ETF Plc (the "Company").
Managed by LGIM Managers (Europe) Limited, a member of the Legal & General group (the "Manager")

OBJECTIVES AND INVESTMENT POLICY

- The L&G All Commodities UCITS ETF (the "Fund") is a passively managed exchange traded fund ("ETF") that aims to track the performance of the Bloomberg Commodity Index Total Return (the "Index"), subject to the deduction of the ongoing charges and other costs associated with operating the Fund.
- Dealing.** Shares in this share class (the "Shares") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the Company. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on www.lgim.com.
- Index.** The Index provides a return equivalent to a fully "collateralised" investment in a diversified portfolio of commodity "futures contracts" across the following sectors: (1) Energy; (2) Precious Metals; (3) Industrial Metals; (4) Livestock; (5) Grains; and (6) Softs. Within the Index, the commodities are primarily weighted according to their relative "liquidity" (a measure of how actively a commodity has historically traded) and "economic significance" (determined by reference to historical production levels). The Index return is comprised of: (1) the "spot" return which reflects the day-to-day changes in the prices of the commodity futures contracts; (2) the "roll" return associated with periodically selling the futures contracts that are nearing their expiry dates (with later-dated equivalents in order to maintain exposure to the commodity futures on an ongoing basis); and (3) the "collateral" return which reflects the interest that a commodity investor would earn where they deposit with a bank (for safe-keeping) the cash that they will need to settle the contract at the future delivery date. A "futures contract" is an agreement to buy or sell a certain amount of an asset (such as a commodity) at a certain date in the future at a price that is agreed upon today.
- Dividend Policy.** This Share Class does not intend to pay dividends. Any income which may result from the Fund's investments will be reinvested into the Fund.
- Replication.** In order to provide the Share Class with exposure to the Index, the Company will primarily enter into "total return swap" agreements with one or more "swap counterparties" (i.e. investment banks) pursuant to which the Share Class receives the financial performance of the Index from the swap counterparties in return for a fee. Under the swap agreements, the Share Class receives payments from the swap counterparties when the Index increases and makes payments to the swap counterparties when the Index decreases. Swaps enable the Share Class to efficiently track the upward or downward performance of the Index without having to purchase the commodity futures contracts comprised in the Index. The swap arrangements are "unfunded" which means that the Fund retains all investor subscription money (rather than transferring it to the swap counterparty) and invests it in a diversified portfolio of low risk assets.
- The Fund's base currency is denominated in US dollar (USD).

RISK AND REWARD PROFILE

Lower Risk ← Higher Risk
Potentially lower rewards ← Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Fund is rated 6 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund's future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean "risk free".
The risk and reward indicator may not take account of the following risks of investing in the Fund:
- Market trading in commodity futures contracts can be extremely "volatile". This means that the prices of the futures contracts comprised in the Index may fluctuate rapidly based on numerous factors, including supply and demand relationships, weather, agriculture, trade, economic or political events, technological developments, interest rates and governmental policies.

- The Fund invests in securities valued in currencies that are different from the base currency of the Fund. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- If a swap counterparty is no longer willing or able to continue entering into swaps with the Fund, the Fund may not be able to continue tracking the Index and may need to close. If a swap counterparty increases the cost of entering into swaps with the Fund, the Fund's performance will be negatively impacted.
- Third party service providers (such as swap counterparties or the Company's depositary) may go bankrupt and fail to pay money due to the Fund or return property belonging to the Fund.
- If the Index provider stops calculating the Index or if the Fund's license to track the Index is terminated, the Fund may have to be closed.
- It may not always be possible to buy and sell Shares on a stock exchange or at prices closely reflecting the NAV.
- There is no capital guarantee or protection on the value of the Fund. Investors can lose all the capital invested in the Fund.
- Please refer to the "Risk Factors" section of the Company's Prospectus and the Fund Supplement.

CHARGES FOR THE FUND

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
