

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Franklin Global Quality Dividend UCITS ETF

Class SINGLCLASS • ISIN IE00BF2B0M76 • A sub-fund of Franklin Templeton ICAV The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin Global Quality Dividend UCITS ETF (the "Fund") invests in high quality large and mid-capitalisation stocks with high and persistent dividend income in developed and emerging market countries globally and seeks to track the performance of the LibertyQ Global Dividend Index (Net Return) (the "Underlying Index") as closely as possible, regardless of whether the Underlying Index level rises or falls.

The Fund seeks to track the performance of the LibertyQ Global Dividend Index (Net Return) (the "Index") as closely as possible, regardless of whether the Index level rises or falls. The Fund is passively managed and aims to replicate the Index by holding all its securities in a similar proportion to their weighting in the Index. The holdings of the Index comprise 50 stocks which are selected from the MSCI ACWI exREITS Index (Net Return), using a transparent selection process which applies a dividend persistence and yield screen followed by a quality screen.

The securities in which the fund invests will be primarily listed or traded on recognised markets globally in accordance with the limits set out in the UCITS Regulations.

The Fund may use derivatives for efficient portfolio management purposes

This Fund may not be appropriate for investors who plan to withdraw their money within five (5) years. $\begin{tabular}{ll} \hline \end{tabular}$

The Fund's shares are listed and traded on one or more stock exchanges. Investors can deal in shares daily through a broker on stock exchange(s) on which the shares are traded. Income from the Fund's investments will be distributed to investors quarterly.

For further information on the Objectives and Investment Policy of the Fund, please refer to the "Investment Objective and Strategy" section of the current prospectus of Franklin Templeton ICAV and the Fund supplement.

Terms to Understand

Derivatives: Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

Developed markets: countries whose economy, stock market, political situation and regulatory framework are developed.

Emerging markets: Countries whose economy, stock market, political situation and regulatory framework are not fully developed.

Equity market performance: the performance of securities that represent an ownership stake in a company on the market.

High and persistent dividend income: the focus is on companies which have higher than average dividend payments that have either remained flat or increased in any of the last four out of five years.

Large-capitalisation stock: stock of companies with large market capitalisation generally accounting accumulatively for the top 70% of the capitalisation of a domestic stock market.

Mid-capitalisation stock: stock of companies with market capitalisation generally accounting accumulatively for the next 20% of the capitalisation of a domestic stock market below large-capitalisation stock.

For distribution shares, dividend income is distributed to investors.

Risk and Reward Profile

Lower risk Potentially lower rewards

Higher risk Potentially higher rewards

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior

Historical data may not be a reliable indication of the future risk profile of the Fund. The catégory shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund intends to track the performance of the Underlying Index which is comprised of 100 stocks which have been selected from the MSCI ACWI exREITS Index (Net Return).

Such assets have historically been subject to price movements due to such factors as general stock market volatility, changes in the financial outlook or

fluctuations in currency markets. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

Risks materially relevant not adequately captured by the indicator:

Counterparty risk: the risk of failure of financial institutions or agents when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes.

Derivative Instruments risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional limitative and to undersprotections.

impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Index related risk: the risk that quantitative techniques used in creating the londex the Fund seeks to track do not reperate the intended result or that

Index the Fund seeks to track do not generate the intended result, or that the portfolio of the Fund deviates from its Index composition or

Secondary market trading risk: the risk that the shares purchased on the secondary market cannot usually be sold directly back to the Fund and that investors may therefore pay more than the NAV per share when buying shares or may receive less than the current NAV per Share when selling shares

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of Franklin Templeton ICAV.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

one on thanges taken belore of alter you mitted		
Entry charge	Not applicable*	
Exit charge	Not applicable*	
This is the maximum that might be taken out of your money before it is invested.
