

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Ossiam ESG Low Carbon Shiller Barclays CAPE® US Sector UCITS ETF (1A (USD) ISIN: IE00BF92LR56) a sub-fund of OSSIAM IRL ICAV (the “ICAV”)

Management Company: Ossiam, part of the Natixis group of companies

### Objectives and Investment Policy

#### Investment objective

The objective of Ossiam ESG Low Carbon Shiller Barclays CAPE® US Sector UCITS ETF (the “Fund”) is to deliver the net total return of a selection of US equities which are part of the Shiller Barclays CAPE® US Sector Value Net TR Index (the “Index”), while taking into account Environment, Social, Governance (“ESG”) criteria and improving carbon performance.

The Index is Sponsored by Barclays Bank plc. and is published and calculated by Bloomberg Index Service Limited.

The Index is determined using the Shiller Barclays CAPE® Index Family Methodology (the “Methodology”) which consists in assessing 10 market sectors, selecting the 5 sectors with the lowest Relative CAPE® (Cyclically Adjusted Price Earnings) ratio (as defined in the prospectus (the “Prospectus”)) and removing the sector with the lowest 12-month price momentum. Each of the 4 remaining sectors is assigned the same weight (25%) and constituents are rebalanced on a monthly basis. No fees are charged at index level upon rebalancing.

The Fund is an actively managed UCITS ETF.

#### Investment strategy

The Fund will seek to achieve its investment objective by investing primarily in large and mid-cap equities which are listed or traded on Recognised Markets in the US and are part of the Index (the “Investment Universe”). The Investment Universe consists solely of the equity securities in the Index.

The Management Company uses a quantitative model which implements a systematic, rules-based exclusion approach. The model uses ESG and carbon data provided by ESG Data Provider including but not limited to Sustainability, ISS, and Trucost and data derived by the Management Company from the data provided by the ESG Data Providers as input in its model to exclude securities from the Investment Universe that are not aligned with the ESG and human rights criteria of the Fund.

The initial screening performed by the Methodologie, an “Energy Filter” is applied. If the energy sector is not selected by the Methodologie, the Sub-Fund invests in the 4 sectors selected by the Methodologie (with each assigned a weight of 25% at the rebalancing as described above). If however the energy sector is selected by the Methodologie, it is excluded by the Sub-Fund which will then only invest in 3 sectors (with each assigned a weight of 1/3 each at the rebalancing). Stocks that pass the Energy Filter are then screened through

the Normative Filter that aims at eliminating securities of companies that are involved in serious violations of widely international norms of responsible corporate behaviour or in controversial business activities (e.g., controversy level 5 on a scale from 0 to 5, controversial weapon business as defined by the ESG Providers; cultivation, production and distribution of tobacco, as defined by the ESG providers; electricity generation with a GHG intensity not compatible with the objectives of the Paris Agreement, according to data provided by the ESG Providers).

Securities that pass all the filters listed above are referred to, collectively, as the “Eligible Universe”. The Management Company then determines the weights of the equities in the Eligible Universe using an optimisation procedure which minimises the active share with respect to the Investment Universe under a number of constraints including greenhouse gas intensity which is 40% lower than the intensity of the Investment Universe and deviation in each sector weight compared to an equal weighting of selected sectors is limited to 0.10%.

The Management Company performs the optimisation on a monthly basis. In certain market conditions, it may be impossible to perform the weighting optimisation while complying exactly with all the constraints. In such circumstances, the Management Company can rateably reduce some of the constraints.

For a detailed description of the Investment Strategy and the Index, see section “Investment Strategy” in the Fund’s supplement (the “Supplement”).

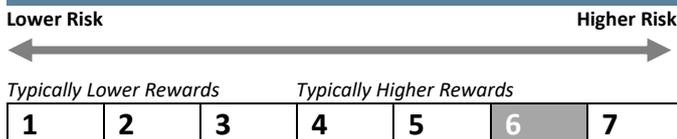

The Reference Currency of the Fund is the US Dollar.

The 1A (EUR) Shares are listed for trading on one or more stock exchanges and investors may buy or sell Shares through their usual broker on any trading day of the relevant stock exchange(s) which is also a Dealing Day in Ireland or, through a fund platform. Please contact your broker for additional information.

The 1A (EUR) Share Class is an accumulating share class therefore income derived from the Fund is reinvested.

**Recommendation:** this Fund may not be appropriate for investors who plan to withdraw their money within less than 5 years.

### Risk and Reward Profile

The Share Class is ranked 6 on the synthetic risk and reward indicator scale, which is based on historical data. Due to its exposure to equity markets, the Share Class may experience important volatility, as expressed by its rank on the above scale. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. There is no capital guarantee or protection on the value of the Share Class. The lowest category does not mean “risk free”.

The following risks are materially relevant to the Fund but are not adequately captured by the synthetic indicator:

None.

Please refer to the Supplement and to the Prospectus for additional details about risks.

## Charges for this Share Class

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-Off charges taken before or after you invest

<b>Entry Charge</b>	Maximum Sales Charge 3.00%
	Maximum Duties and Charges for Subscriptions 1.00%
<b>Exit Charge</b>	Maximum Redemption Charge 3.00%
	Maximum Duties and Charges for Redemptions 1.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the Share Class over a year

Ongoing Charges: 0.75% p.a.

### Charges taken from the Share Class under certain specific conditions

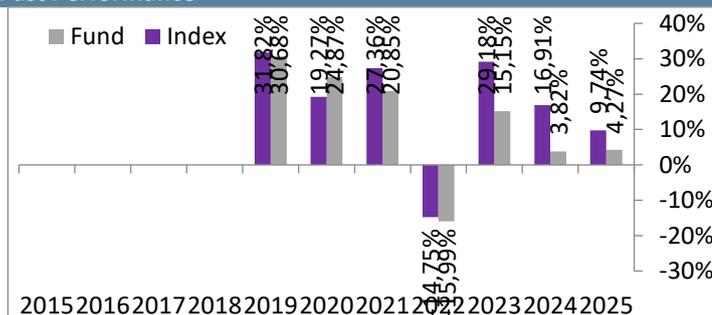

Performance Fee: None

The **entry** and **exit charges** shown are maximum figures. In some cases, you might pay less – you can find this out from your financial adviser.

The **ongoing charges** figure is based on expenses for the year ending December 2025. This figure may vary from year to year. It excludes the portfolio transaction costs, except in the case of an entry/exit charge paid by the ICAV when buying or selling units in another collective investment undertaking.

**For more information about charges, please refer to sections “Purchase and Sale Information”, “Fees and Expenses” of the Prospectus, section “Key Information” of the Supplement, and to the ICAV annual reports which are available at [www.ossiam.com](http://www.ossiam.com).**

## Past Performance

Past performance is not a reliable indicator of future performance.

**This bar chart shows the performance of the 1A (USD) Share Class in its currency of quotation, net of ongoing charges and excluding entry or exit charges.**

Launch date of Fund: 5 April 2018.

Launch date of the Share Class: 5 April 2018.
