

First Trust Cloud Computing UCITS ETF

First Trust Global Portfolios Management Limited is the manager of the Company (the "Manager")

Share class: Class A USD

Objective: The fund seeks to provide investors with investment results that correspond generally to the price and yield of an equity index called the ISE CTA Cloud Computing Index (the "Index").

The Investment Manager will seek to do this by trying to replicate the Index by holding in similar proportions the equity securities in the Index. The Fund may, where direct investment in a constituent of the Index is not possible, invest in depository receipts to gain exposure to the security. The fund may also invest to a much lesser extent in money market instruments, short-term instruments and other eligible funds. The Investment Manager will regularly monitor how closely the fund tracks the Index. It is expected that the level of tracking error will be 0-2% in normal market conditions.

For details of the exact composition of the Index, please see the following address:
<https://indexes.nasdaqomx.com/Index/Overview/CPQ>.

Income is reinvested into the Fund for this share class.
