First Trust Cloud Computing UCITS ETF

A sub-fund of First Trust Global Funds ICAV (the "ICAV")

First Trust Global Portfolios Management Limited is the manager of the ICAV (the "Manager")

ISIN: IE00BFD2H405

Share class: Class A USD ACC

Objective and Investment Policy

Objective: The Fund seeks to provide investors with investment results that correspond generally to the price and yield of an equity index called the ISE CTA Cloud Computing Exclusions Index (the "Index").

Investment Policy: The Fund invests primarily in equity securities that are included in the Index. The Fund attempts to replicate, before fees and expenses, the performance of the Index.

The Investment Manager will seek to do this by trying to replicate the Index by holding in similar proportions the equity securities in the Index. This Fund may, where direct investment in a constituent of the Index is not possible, invest in depository receipts to gain exposure to the security and may also invest in money market instruments, short-term instruments and other eligible Funds. The Investment Manager will regularly monitor how closely the Fund tracks the Index. It is expected that the level of tracking error will be 0-2% in normal market conditions.

The Fund is passively managed and has an index replicating objective.

For more information about the investment policy, see "Investment Policy" in the Fund's section on supplement available at www.ftglobalportfolios.com. Information on portfolio composition is, where applicable, also available through this website.

You may sell your shares usually on each business day (a day on which the London Stock Exchange is open) by sending your request to the administrator.

Income is reinvested into the Fund for this share class.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short term.

Risk and Reward Profile

The risk category is based on simulated and historical data and may not be a reliable indicator of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time.

The indicator is designed to help investors understand the uncertainties for both loss and for growth that may affect their investment. The lowest category does not mean that the investment is risk free.

The Fund is ranked at 7 because Funds of this type have experienced high rises and falls in value in the past.

The following risks are materially relevant to the Fund which may not be adequately captured by the indicator:

The Fund may not achieve its investment objective and the value of shares in the Fund may fall.

The Fund may be subject to information technology companies risk. Information technology companies are generally subject to the following risks: rapidly changing technologies; short product life cycles; fierce competition; aggressive pricing and reduced profit margins; the loss of patent, copyright and trademark protections; cyclical market patterns; evolving industry standards; and frequent new product introductions. Information technology companies may be smaller and less experienced companies, with limited product lines, markets or financial resources and fewer experienced management or marketing personnel. Information technology company stocks, particularly those involved with the Internet, have experienced extreme price and volume fluctuations that are often unrelated to their operating performance.

There is no assurance that the Index will continue to be calculated and published on the basis described in the Prospectus. In addition, the Fund's return may not match the return of the Index.

See also the description of the risks applicable to the Fund in "Risk Factors" in the Fund's Prospectus and supplement thereto.
