## JPM Global Equity Multi-Factor UCITS ETF - USD (acc)

a Share Class of JPMorgan ETFs (Ireland) ICAV – Global Equity Multi-Factor UCITS ETF. The management company is JPMorgan Asset Management (Europe) S.à r.l.

### Objectives and Investment Policy

**Investment Objective:** The Sub-Fund seeks to provide returns that correspond to those of its Index.

**Investment Policy:** The Sub-Fund pursues a passively managed (indextracking) strategy.

The Sub-Fund aims to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

The Index is comprised of large and mid-capitalisation equity securities issued in developed markets globally, is published by FTSE Russell and rebalances quarterly (as referred to under the "Index Tracking Risk" in the Prospectus). Further details on the Index, including its components and performance, are available at <https://www.ftse.com/products/indices/jpmorgan-factor>.

The Index is designed to capture the performance of stocks which display certain factor characteristics more strongly when compared to their peer group (i.e. other stocks in the same sector or region). Factors are characteristics that describe the risk and return profile of securities from which investors expect to achieve above average returns over time, through assuming a particular risk or taking advantage of a behavioural bias.

The Index allocates regional weights according to the FTSE Developed Index and then uses a two-step rules-based approach that weights sectors equally based on volatility followed by a stock selection process that uses multiple factors referred to as "multi-factor". This process involves investing in stocks in the FTSE Developed Index according to an overall multi-factor score derived from equally weighting the three factors described below:

- Value. The tendency of stocks trading at a lower price relative to their fundamental characteristics (such as their price-to-earnings or price-to-book ratios) to generate more attractive returns over the long term.

- Momentum. The tendency of stocks which have exhibited higher returns relative to their volatility to continue to exhibit more attractive returns.
- Quality. The tendency of stocks of financially stable companies (based on measures of their solvency, their profitability, and the quality of their earnings) to generate more attractive returns relative to their volatility over the long term.

The Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments.

USD is the base currency of the Sub-Fund.

It is currently anticipated that the tracking error of the Sub-Fund will be up to 100 bps under normal market conditions. The causes of tracking error can include but are not limited to the following: holdings/size of the Sub-Fund, cash flows, such as any delays in investing subscription proceeds into the Sub-Fund or realising investments to meet redemptions, fees and the frequency of rebalancing against the Index.

**Redemption and Dealing:** Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

**Index:** JP Morgan Diversified Factor Global Developed (Region Aware) Equity Index.

**Distribution Policy:** This Share Class will not pay dividends.

### Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

**Why is this Share Class in this category?** This Share Class is classified in category 5 because its Net Asset Value has shown medium to high fluctuations historically.

### OTHER MATERIAL RISKS

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of equities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.
- Since the instruments held by the Sub-Fund may be denominated in currencies other than the Base Currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of the Shares.
- The Sub-Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Sub-Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Further information about risks can be found in the "Risk Information" section of the Prospectus.

## Charges

### One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from this Share Class over a year

Ongoing charge	0.20%
----------------	-------

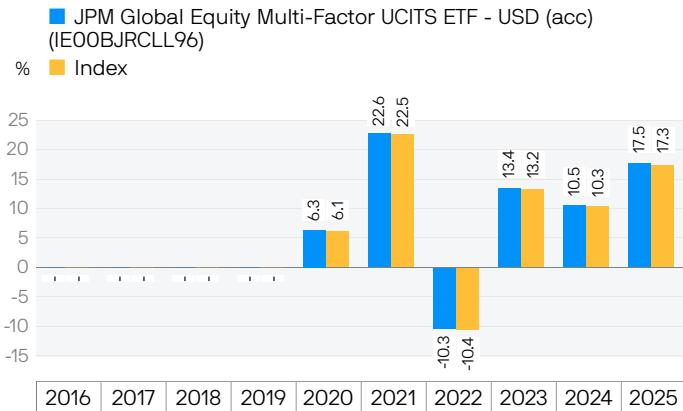

### Charges taken from this Share Class under certain specific conditions

Performance fee	None
-----------------	------

- Investors who are not Authorised Participants may have to pay brokerage commissions or other charges determined and imposed by their brokers when buying or selling Shares on stock exchange(s). Information on charges can be obtained from your broker. Authorised Participants dealing directly with JPMorgan ETFs (Ireland) ICAV will pay related transaction costs.

- Charges are used to pay the costs of running this Share Class, including the costs of marketing and distribution. These charges reduce the potential growth of the investment.
- The ongoing charge is estimated and is based on the expected charges. This includes a stock lending fee. The UCITS' annual report for each financial year will include details on the charges made.
- Further information about charges can be found in the "Fees and Expenses" section of the Prospectus.

## Past Performance

- Past performance is not a guide to future performance.
- Performance data has been calculated including tax, ongoing charges and portfolio transaction costs and excluding entry and exit charges, in USD.
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- Sub-Fund launch date: 2019.
- Share Class launch date: 2019.
