The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

L&G Artificial Intelligence UCITS ETF

Share Class USD Accumulating ETF - ISIN: IE00BK5BCD43. The Fund is a sub-fund of Legal & General UCITS ETF Plc (the "Company").
Managed by LGIM Managers (Europe) Limited, a member of the Legal & General group (the "Manager")

OBJECTIVES AND INVESTMENT POLICY

- The L&G Artificial Intelligence UCITS ETF (the "Fund") is a passively managed exchange traded fund ("ETF") that aims to track the performance of the ROBO Global® Artificial Intelligence Index (the "Index"), subject to the deduction of the ongoing charges and other costs associated with operating the Fund.
- The Fund promotes a range of environmental and social characteristics which are met by tracking the Index. Further information on how such characteristics are met by the Fund can be found in the Fund Supplement.
- Dealing.** Shares in this share class (the "Shares") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the Company. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on www.lgim.com.
- Index.** The Index is comprised of companies which are publically traded on various stock exchanges around the world that generate a proportion of their revenues from the artificial intelligence industry. The industry is deemed to be comprised of the following two sub-sectors: (1) Technology, which includes big data/analytics, cloud providers, cognitive computing, network and security, and semiconductor; and (2) Applications and Services, which includes business process, consulting services, consumer, ecommerce, factory automation and healthcare. A company is only eligible for inclusion in the Index if it is of a sufficient size (determined by reference to the total market value of its shares) and it is sufficiently "liquid" (a measure of how actively its shares are traded on a daily basis). Within the Index, companies involved in the artificial intelligence industry are assigned a score which is a measure of a company's revenue, investment exposure and the market positioning in the artificial intelligence industry (the "Score"). Constituents are weighted according to their Score. Each constituent's weight is calculated by dividing its Score by the sum of all available Scores in the eligible universe.
- Replication.** The Fund will primarily invest in the companies contained in the Index in similar proportions to their weightings in the Index. The Fund may also invest in (1) "technology" companies that are not constituents of the Index that have similar risk and performance characteristics to the companies contained in the Index and (2) financial derivative instruments ("FDIs") (i.e. investments the prices of which are based on the companies contained in the Index and/or such other "technology" companies).
- Dividend Policy.** This share class does not intend to pay dividends. Any income which may result from the Fund's investments will be re-invested into the Fund.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Fund is rated 7 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund's future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean "risk free".
- As the Index includes micro, small and medium-sized publicly traded companies, the Fund is subject to the risk that such companies may be more vulnerable to adverse business or economic events and greater and more unpredictable price changes than larger companies or the stock market as a whole.
- The Fund is subject to the risks associated with technology-focused companies that are particularly vulnerable to rapid developments in technology (which may leave their products out-of-date), government regulation and competition from domestic and foreign competitors who may have lower production costs. Such companies may also have difficulties establishing and maintaining patents, copyrights, trademarks and trade

secrets relating to their products which could negatively affect their value.

The risk and reward indicator may not take account of the following risks of investing in the Fund :

- The Fund may have underlying investments that are valued in currencies that are different from USD, in which case exchange rate fluctuations will impact the value of your investment. In addition, the return in the currency of this share class may be different to the return in your own currency.
- Third party service providers (such as counterparties entering into FDIs with the Fund or the Company's depository) may go bankrupt and fail to pay money due to the Fund or return property belonging to the Fund.
- If the Index provider stops calculating the Index or if the Fund's license to track the Index is terminated, the Fund may have to be closed.
- It may not always be possible to buy and sell Shares on a stock exchange or at prices closely reflecting the NAV.
- There is no capital guarantee or protection on the value of the Fund. Investors can lose all the capital invested in the Fund.

Please refer to the "Risk Factors" section of the Company's Prospectus and the Fund Supplement.

CHARGES FOR THE FUND
