### Alerian Midstream Energy Dividend UCITS ETF (the Fund) - Distributing ETF Share Class

ISIN: IE00BKPTXQ89

A sub-fund of HANetf ICAV. Managed by HANetf Management Limited (the **Manager**)

### Objectives and Investment Policy

The Fund is a passively managed Exchange-Traded Fund (ETF), which seeks to track the price and yield performance, before fees and expenses, of the Alerian Midstream Energy Corporation Dividend Index (the “**Index**”).

The Index is a dividend-weighted index based on the dividend-paying portion of the North American energy infrastructure market. The Index measures the performance of companies domiciled in the US or Canada that earn the majority of cashflows from the qualifying midstream activities involved energy commodities. The following activities as defined by the Energy MLP Classification Standards (EMCS) are considered qualifying: gathering & processing, liquefaction, pipeline transportation, rail terminaling and storage. Cashflow is calculated on a trailing four-quarter basis using a company’s reported business segments.

Eligible companies must have declared a dividend or distribution for the preceding two quarters and have a median daily trading volume of at least US\$1 million for the six-month period preceding an index rebalance. Be listed on a regulated market as listed in Appendix 1 of the Prospectus.

The Index is rebalanced quarterly.

**Replication:** The Fund will employ a "passive management" (or indexing) investment strategy and will seek to employ a physical replication methodology, meaning as far as possible and practical, it will invest in the equity securities of companies in proportion to the weightings comprising the Index.

**Dealing:** Shares of the Fund (“**Shares**”) are listed on one or more stock exchanges. Typically, only authorised participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.

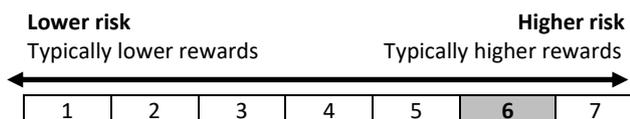

**Distribution policy:** Income received by the Fund’s investments will be distributed quarterly in respect of the Shares of this class.

**Recommendation:** This Fund may not be appropriate for short-term investment.

**Currency:** The base currency of the Fund is US Dollar.

For full investment objectives and policy details, please refer to the supplement to the prospectus for the Fund (the “**Supplement**”).

### Risk and Reward Profile

The categorisation above is not guaranteed to remain unchanged and may shift over time.

The lowest category (1) does not imply a risk-free investment.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The categorisation above (6) is due to the nature of the Fund’s investments and risk associated with those investments, including:

- There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
- The fund may engage in securities lending activity.
- **Sectoral investment risk:** Energy infrastructure companies may be subject to specific industry and sector risks such as commodity price fluctuations and decrease in demand for energy during a recession.
- **Energy infrastructure companies:** The return on investment in energy infrastructure companies may be influenced by fluctuations in energy prices or changes to the US economic

situation. Some smaller capitalisation energy infrastructure companies involve greater risk than is customarily associated with larger, more established entities and may be subject to abrupt or erratic movements in price.

- **Currency risk:** The Fund invests in securities denominated in currencies other than its base currency. Changes in the exchange rates may adversely affect the performance of the Fund.

Risks not covered by the indicator, but which are materially relevant to the Fund include:

- **Liquidity on secondary market risk:** There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.
- **Tracking error risk:** The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.

For a complete overview of all risks attached to this Fund, refer to the section entitled “**Risk Factors**” in the Supplement and the Prospectus.
