iShares Smart City Infrastructure UCITS ETF

A sub-fund of iShares IV plc

USD (Dist) Share Class

ISIN: IE00BKTLJB70

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the STOXX Global Smart City Infrastructure Index, the Fund's benchmark index (Index).
- ▶ The Share Class, via the Fund is passively managed, and aims to invest in equity securities (e.g. shares) that, so far as possible and practicable, make up the Index.
- ▶ The Index reflects the performance of a sub-set of global equity securities of eligible countries within the STOXX Global Total Market Index (the "Parent Index") which derive significant revenues from sectors associated with two global thematic trends: (i) smart cities; and (ii) infrastructure. Companies included in the Index must generate at least 50% (45% for existing companies in the Index) of their annual revenues from one or multiple predefined sectors relevant to the smart city and infrastructure theme. These include cellular site equipment, metal recycling providers, multi-type passenger transportation and water treatment agents manufacturing. In addition, the Index aims to have a minimum number of 80 constituents at the time of each rebalance however if the application of the revenue filter results in there being fewer than 80 constituents in the index, it is progressively lowered in accordance with the index provider's methodology, until the number of constituents is equal to or greater than 80. Companies in the Index must also meet the index provider's criteria for market capitalization and trading volume and be domiciled in an eligible country which is also determined by the index provider.
- ▶ The Index excludes companies from the Parent Index which are identified by the index provider as being involved in certain business lines/activities, as outlined in the Index description of the Fund in the Fund's Prospectus.
- ▶ The Fund's investment in securities that make up the Index will, at the time of purchase, comply with the credit or ESG requirements of the Index. Where securities no longer meet such requirements, the Fund may continue to hold them until they cease to form part of the Index and it is practicable to sell them.
- ▶ The Fund will take into account such ESG criteria only when selecting the securities to be held directly by the Fund. The Fund may obtain indirect exposure (for example, through financial derivative instruments ("FDIs") (i.e. investments the prices of which are based on one or more underlying assets) and units in collective investment schemes) to securities considered not to satisfy these ESG criteria. The Index may include small, mid and/or large capitalisation constituents of the Parent Index from both developed and emerging market countries globally. Each constituent of the Index is adjusted equally weighted at each Index rebalance.
- ▶ The Fund uses optimising techniques to achieve a similar return to its Index. These techniques may include the strategic selection of certain securities that make up the Index or other securities which provide similar performance to certain constituent securities. These may also include the use of FDIs, which may be used for direct investment purposes.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be distributing shares (i.e. income will be paid on the shares semi-annually).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
 - Shares in smaller companies typically trade in less volume and experience greater price variations than larger companies.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depository and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
