ISIN: IE00BL643144

A sub-fund of HANetf ICAV. Managed by HANetf Management Limited (the **Manager**)

Objectives and Investment Policy

The Fund seeks to achieve growth of capital over the medium to long term as its investment objective. The Fund will typically invest at least 80% of its portfolio in global equities and equity related securities both in developed and emerging markets. To a lesser extent, the fund may also invest in sovereign bonds issued by the governments of developed market countries.

The fund may also invest in ancillary liquid assets and money market instruments such as bank deposits, certificates of deposit, commercial paper, floating rate notes and freely transferable promissory notes. The fund may also invest in ETFs established as collective investment schemes and authorised as UCITS in pursuit of its investment objective.

The Investment Manager will identify global themes using quantitatively determined data points to select companies within those themes. The Investment Manager will then apply its valuation criteria to the identified universe. As a final step, the

Investment Manager will construct the portfolio to seek to deliver strong risk-adjusted returns.

Investment Policy: The fund employs an active management investment approach in order to achieve its investment objective.

Dealing: Shares of the Fund (**Shares**) are listed on one or more stock exchanges. Typically, only authorised participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.

Distribution policy: Income received by the Fund's investments will not be distributed in respect of the Shares of this class and instead income will be accumulated and reinvested on behalf of the shareholders of the Fund.

Risk and Reward Profile

The categorisation above is not guaranteed to remain unchanged and may shift over time.

The lowest category (1) does not imply a risk-free investment.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The categorisation above (6) is due to the nature of the Fund's investments and risk associated with those investments, including:

- The value of underlying securities can be affected by daily financial market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
- **Active Management Risk:** The Fund's assets will be actively managed by the Investment Manager who will have discretion (subject to the Sub-Fund's investment restrictions) to invest the Fund's assets in investments that it considers will enable the Sub-Fund to achieve its investment objective. There is no guarantee that the Fund's investment objective will be achieved based on the investments selected.
- **Interest Rate Risk:** Changes in interest rates can influence

the value and returns of some of the Fund's investments. Declining interest rates may affect the return on available reinvestment opportunities. In the event of a general rise in interest rates, the value of certain investments that may be contained in the Fund's investment portfolio may fall, reducing the NAV of the Fund. Fluctuation in rates may affect interest rate spreads in a manner adverse to Fund. Interest rates are highly sensitive to factors beyond a Fund's control, including among others government monetary and tax policies, and domestic and international economic and political conditions.

- **Currency risk:** The Fund invests in securities denominated in currencies other than its base currency. Changes in the exchange rates may adversely affect the performance of the Fund.

Risks not covered by the indicator, but which are materially relevant to the Fund include:

- **Liquidity on secondary market risk:** There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.

It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the Fund buys or sells securities may compare adversely to the price under normal market conditions.

For a complete overview of all risks attached to this Fund, refer to the section entitled "**Risk Factors**" in the Supplement and the Prospectus.
