RIZE ENVIRONMENTAL IMPACT 100 UCITS ETF: USD Accumulating ETF

ARK Invest UCITS ICAV (the "ICAV")

ISIN: IE00BLRPRR04

The Fund is a sub-fund of ARK Invest UCITS ICAV (the "ICAV").

Managed by IQ EQ Fund Management (Ireland) Limited (the "Manager") of the IQ EQ group of companies

Objectives and Investment Policy

FUND. The Rize Environmental Impact 100 UCITS ETF (the "Fund") is a passively managed exchange traded fund ("ETF") that aims to replicate the performance of the Foxberry SMS Environmental Impact 100 USD Net Total Return Index (the "Index") while positively impacting climatic and environmental challenges.

INDEX. The Index is designed to provide exposure to global publicly-traded companies that are developing and applying innovative and impactful solutions to tackle the world's most pressing climatic and environmental challenges. The taxonomy employed by the Index has been designed to be specifically-aligned to the six environmental objectives set out in the EU Sustainable Finance Taxonomy: (1) Climate change mitigation; (2) Climate change adaptation; (3) The sustainable use and protection of water and marine resources; (4) The transition to a circular economy; (5) Pollution prevention and control; and (6) The protection and restoration of biodiversity and ecosystems.

The Index shall be rebalanced on a semi-annual basis. Please refer to the "The Index" section of the Fund Supplement for further detail

TRACKING METHOD. The Fund will primarily invest in the companies contained in the Index in similar proportions to their weightings in the Index. The Fund may also invest in (1) Depositary receipts relating to the companies contained in the Index and (2) financial derivative instruments ("FDIs") which are investments the prices of which are based on the companies contained in the Index.

DIVIDEND POLICY. This Share Class does not intend to pay dividends. Any income which may result from the Fund's investments will be re-invested into the Fund.

DEALING. Shares in this Share Class (the "Shares") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the ICAV. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on <http://www.rizeetf.com>

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is rated 6 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund's future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean "risk free".

The Fund may be subject to the risks associated with companies operating in the renewable energy sectors including, but not limited to, fluctuating energy prices which impact upon company revenues, weather fluctuations that impact the ability to generate electricity, the risk that existing regulatory frameworks (the benefits of which might include commitments to pay premium prices, priority access to electricity grids, support for the necessary infrastructure investments and guarantees of purchases of renewable energy output) become less supportive and the cost of producing renewable energy which can be high relative to conventional energy sources / technologies (which pose a risk to the long term economic viability of renewable energy ventures).

Some companies may be smaller and less experienced companies, with limited product lines, markets or financial resources and fewer experienced management or marketing personnel. They may experience extreme price and volume fluctuations that are often unrelated to their operating performance.

The Index is typically comprised of a mix of micro, small, mid and large capitalisation companies. Micro and small capitalisation companies may be more vulnerable to adverse business or economic events than larger, more established companies and may underperform other segments of the market or the equity market as a whole. Securities of micro and small capitalisation companies generally trade in lower volumes, are less liquid and are often more vulnerable to market volatility and greater and more unpredictable price changes than larger capitalisation stocks or the stock market as a whole.

Other: (1) Third party service providers (such as the ICAV's depositary) may go bankrupt and fail to pay money due to the Fund or return property belonging to the Fund. (2) If the Index provider stops calculating the Index or if the Fund's license to replicate the Index is terminated, the Fund may have to be closed. (3) It may not always be possible to buy and sell the Fund's Shares on a stock exchange or at prices closely reflecting the Net Asset Value. (4) There is no capital guarantee or protection on the value of the Fund and investors can lose all the capital invested in the Fund. (5) Please refer to the "Risk Factors" section of the ICAV's Prospectus and the Fund Supplement.
