Fidelity ESG USD EM Bond UCITS ETF

a sub-fund of Fidelity UCITS II ICAV

Fidelity ESG USD EM Bond UCITS ETF GBP Hedged Acc
(ISIN:IE00BM9GRQ71)

This fund is managed by FIL Investment Management (Luxembourg) S.A., Ireland Branch

Objectives and Investment Policy

Objective: The fund aims to achieve income and capital growth.

Investment Policy: The fund invests in a portfolio primarily made up of debt securities denominated in USD issued by governments and government agencies of emerging market countries.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the Benchmark.

The fund may use derivatives for efficient portfolio management and currency hedging purposes.

Investment Process: The fund is actively managed and references the Benchmark (as defined below) as part of its investment process.

The fund uses fundamental research and quantitative techniques as well as its own ESG assessment to select securities which are weighted with a view to delivering positive returns relative to the Benchmark and improving the portfolio's overall ESG score.

On an ongoing basis, the fund will consider a wide range of environmental and social characteristics such as carbon intensity, carbon emissions, energy efficiency, water and waste management, biodiversity, product safety, supply chain, health and safety and human rights.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex sections of the Prospectus.

Base Currency: USD

Benchmark: JP Morgan ESG EMBI Global Diversified Index (the "Benchmark") Used for: investment selection, risk monitoring, performance and carbon footprint comparison.

The Benchmark tracks emerging market fixed and floating-rate debt instruments that are denominated in US Dollars and issued by sovereign and quasi-sovereign entities. The Benchmark applies ESG screens as part of its methodology. The fund holds a portfolio of securities which is systematically selected and managed with the aim of outperforming the Benchmark; however, the Investment Manager will only invest in securities which are part of the Benchmark and will consider the Benchmark, when selecting investments for the fund and for the purposes of monitoring risk.

While the fund invests in securities included in the Benchmark in different proportions to the Benchmark, the Benchmark constituents are generally representative of the fund's portfolio. This means that both the fund's portfolio and performance is unlikely to vary significantly from those of the Benchmark, however the fund aims to outperform the Benchmark over the long term.

Distribution: As this is a non-distributing share class, dividends are reinvested.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average.

Additional risks: liquidity.

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
