

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

L&G Cyber Security UCITS ETF

Share Class USD Accumulating ETF - ISIN: IE00BYPLS672. The Fund is a sub-fund of Legal & General UCITS ETF Plc (the "Company").
Managed by LGIM Managers (Europe) Limited, a member of the Legal & General group (the "Manager")

OBJECTIVES AND INVESTMENT POLICY

- The investment objective of the Fund is to provide exposure to publicly-listed companies from across the world that are involved in the cyber security industry.
- The Fund is passively managed and aims to track the performance of the ISE Cyber Security® UCITS Index Net Total Return (the "Index"), before the deduction of fees and expenses.
- The Index is designed to provide exposure to global companies that are active in the cyber security industry, in accordance with its methodology.
- The Fund seeks to achieve its investment objective by investing primarily in equity securities that, as far as possible and practicable, make up the Index in similar proportions to their weightings in the Index. Where it is not possible or practicable to invest directly in all of the constituents of the Index, the Fund may also invest in equity related securities and instruments that are not constituents of the Index but have similar risk and performance characteristics, and may use financial derivative instruments for efficient portfolio management or to assist in tracking the performance of the Index.
- The Fund promotes a range of environmental and social characteristics which are met by tracking the Index. Further information on how such characteristics are met by the Fund can be found in the Fund Supplement.
- This Share Class does not intend to pay dividends. Any income which may result from the Fund's investments will be reinvested into the Fund.
- Shares in this share class (the "Shares") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the Company. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on www.lgim.com.
- The Fund's base currency is denominated in US dollar (USD).

RISK AND REWARD PROFILE

Lower Risk ← Higher Risk
Potentially lower rewards Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Fund is rated 6 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund's future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean "risk free".
- The risk and reward indicator may not take account of the following risks of investing in the Fund:
- As the Index includes micro, small and medium-sized publicly traded companies, the Fund is subject to the risk that such companies may be more vulnerable to adverse business or economic events and greater and more unpredictable price changes than larger companies or the stock market as a whole.
 - The Fund invests in technology companies whose products may face rapid obsolescence due to technological developments and frequent new product introduction. Such companies may face unpredictable changes in growth rates, competition for the services of qualified personnel and intense domestic and international competition, including

competition from foreign competitors with lower production costs. Such companies are heavily dependent on patent and intellectual property rights. The loss or impairment of these rights may adversely affect the profitability of these companies. Additionally, companies in the cyber security field may be the target of cyber attacks themselves, which, if successful, could significantly or permanently damage a company's reputation, financial condition and ability to conduct business in the future.

- The Fund invests in securities valued in currencies that are different from the base currency of the Fund. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Third party service providers (such as counterparties entering into FDIs with the Fund or the Company's depository) may go bankrupt and fail to pay money due to the Fund or return property belonging to the Fund.
- If the Index provider stops calculating the Index or if the Fund's license to track the Index is terminated, the Fund may have to be closed.
- It may not always be possible to buy and sell Shares on a stock exchange or at prices closely reflecting the NAV.
- There is no capital guarantee or protection on the value of the Fund. Investors can lose all the capital invested in the Fund.
- Please refer to the "Risk Factors" section of the Company's Prospectus and the Fund Supplement.

CHARGES FOR THE FUND
