FIDELITY US QUALITY INCOME UCITS ETF

a sub-fund of FIDELITY UCITS ICAV I

FIDELITY US QUALITY INCOME UCITS ETF INC

(ISIN: IE00BYXVGX24)

This fund is managed by FIL Investment Management (Luxembourg) S.A.R.L.

Objectives and investment policy

Objective: The fund aims to provide investors with a total return, taking into account both capital and income returns, which reflects, before fees and expenses, the return of the Fidelity US Quality Income Index (the "Index").

Investment Policy: The investment policy of the fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the fund's performance and that of the Index. The fund will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index. The fund may use derivatives for efficient portfolio management and currency hedging purposes.

Investment Process: The fund uses a benchmark "index tracking" (also known as "passive") investment management approach by tracking the Index. The Index is designed to reflect the performance of stocks of large and mid-capitalization dividend paying US companies that exhibit quality fundamental characteristics. The Index comprises the equity securities of the relevant companies. The Index applies ESG screens and integrates ESG ratings in the index construction as part of its methodology so that a minimum of 50% of its constituents are deemed to maintain desirable ESG characteristics. The Index constituents are also screened according to fundamental measures as well as certain ESG exclusionary criteria based on norm-based screening and negative screening of certain sectors, companies or practices. For more information on the Index, please refer to the publically available index methodology at www.spdji.com.

Risk and reward profile

Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment. The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the
