

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Invesco FTSE Emerging Markets High Dividend Low Volatility UCITS ETF (the "Fund") A sub-fund of Invesco Markets III plc (the "Umbrella Fund") Dist (ISIN: IE00BYYXBF44) (the "Share Class")

The Fund is managed by Invesco Investment Management Limited, part of the Invesco Group.

Objectives and Investment Policy

- The objective of the Fund is to generate income together with capital growth which, before expenses, would correspond to the price and yield performance of the return on the FTSE Emerging High Dividend Low Volatility Index (Net Total Return) in USD (the "Index")¹ by replicating all of the constituents of the Index. The Fund is a passively managed Exchange-Traded Fund ("ETF").
- The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances investors will be permitted to redeem their shares directly from Invesco Markets III plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- An index measures the performance of a selection of shares representative of the overall market or a subsection of it.
- The Fund aims to achieve its objective by providing investors with a broad exposure to companies in emerging markets that historically have provided high dividend yields with lower volatility (price fluctuations).
- To achieve the investment objective the Fund will, as far as possible and practicable, hold all the securities in the Index in their respective weightings.
- To be eligible for inclusion in the Index a security must be included in the Parent Index, have at least 12 months historical volatility and dividend yield values available, and be tested for liquidity by calculation of its recent 3-month Average Daily Trading Value (the "ADTV"). The ADTV is a measure of liquidity and refers to the average number of shares of a particular stock which changes hands during a single trading day. The Index is rebalanced annually.
- You can buy and sell shares in the Fund on any Business Day (as defined in the Prospectus).
- Any income from your investment will be paid quarterly.

Risk and Reward Profile

Lower Risk ← Higher Risk
Typically lower rewards Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Share Class is in risk category 5 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- **General Investment Risk:** The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested.
- **Currency risk:** The Fund's performance may be adversely affected by variations in the exchange rates between the base currency of the Fund and the currencies to which the Fund is exposed.
- **Emerging market risk:** As a large portion of this fund is invested in less developed countries, investors should be prepared to accept a higher degree of risk than for an ETF that invests only in developed markets.
- **Equity Risk:** The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund.
- **Securities lending:** The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults.
- For more information on risks, please see the Fund prospectus under "Risk Factors", which is available at etf.invesco.com (select your country and navigate to the Prospectus on the Documents section on the product page).
