

### Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Xtrackers MSCI World UCITS ETF

**Share class: 2D - GBP Hedged, ISIN: IE00BZ1BS790, Security code: A2DF98, Currency: GBP**

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

### Objectives and investment policy

The fund is passively managed. **INVESTMENT OBJECTIVE:** The aim is for your investment to track the performance, before fees and expenses, of the MSCI Total Return Net World index (index) which is designed to reflect the performance of the shares of certain companies of various developed countries, while seeking to minimise foreign currency fluctuations at share class level. **DESCRIPTION OF INDEX:** The companies making up the index are large and medium sized companies based on the combined value of a company's readily available shares as compared to other companies. A company's weighting in the index depends on its relative size. As of 31 May 2019, the index consists of the following developed markets: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States of America. The underlying constituents of the index are listed in multiple currencies. **INDEX REBALANCING, CALCULATION AND ADMINISTRATION:** The index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions. The index is calculated in US Dollars on a daily basis. **INVESTMENT POLICY:** To achieve the aim, the

fund will i) attempt to replicate the index, before fees and expenses, by buying a portfolio of securities that may comprise the constituents of the index or other unrelated investments as determined by DWS entities and ii) enter into financial contracts (derivatives) which attempt to reduce the effect of exchange rate fluctuations between the currency of the fund's assets and the currency of your shares. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). The fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the fund. **FURTHER INFORMATION:** Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at [www.Xtrackers.com](http://www.Xtrackers.com). Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is USD. The fund distributes up to four times per annum. You may request the redemption of shares generally on a daily basis.

### Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore relatively high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. **EXCEPTIONAL CIRCUMSTANCES RISK:** Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. **CONFLICTS OF INTEREST RISK:** DWS entities and related companies may act in several roles in relation to the fund such as

distributor and management company which may involve conflicts of interest. **NO GUARANTEE RISK:** The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. **RULES BASED INDEX RISK:** The index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances. **DISRUPTIONS/ADJUSTMENT EVENTS RISK:** The index may also be subject to disruption or adjustment events which may prevent its calculation or lead to adjustments to the rules of the index which may cause your investment to suffer losses. **CURRENCY RISK:** Investors in the fund are exposed to fluctuations between the currencies of the underlying constituents of the index (being the fund's assets) and US Dollar. **DERIVATIVES RISK:** The fund may use derivatives to i) try to manage its investments more efficiently and ii) try to reduce movements in currency exchange rates between the currency of the fund's assets and the currency of the fund's shares. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

### Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.17 %
Charges taken from the fund under certain specific conditions	
Performance fee	None
Securities lending fees	0.00 %

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2025. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

To the extent the fund undertakes securities lending to generate revenue, the fund will ultimately be allocated 82% of the associated revenue, the securities lending agent, which will be a Deutsche Bank entity, will be allocated 9% and the remaining 9% will be allocated to the DWS entity which monitors such activities, as set out in the sales prospectus and/or supplement, for its own coordination and oversight

tasks. As securities lending revenue sharing does not increase the costs of running the fund, this has been excluded from the composition of costs.

## Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 2D - GBP Hedged share class of Xtrackers MSCI World UCITS ETF were deducted during the calculation. The 2D - GBP Hedged share class of Xtrackers MSCI World UCITS ETF was launched in 2017.

As of 12 April 2018 the share class changed its benchmark index to MSCI Total Return Net World Index. The investment objectives of the share class are unchanged and continues to hedge currency risk. The index performance shown for 2018 is based solely on the performance of the MSCI Total Return Net World Index.

## Practical information

The depositary is State Street Custodial Services (Ireland) Limited, Ireland. Copies of the prospectus and the periodic reports are available free of charge in the language of this document. The documents as well as other information (including the latest share prices as well as the indicative net asset values) are available free of charge.
