OSSIAM SHILLER BARCLAYS CAPE® EUROPE SECTOR VALUE TR (UCITS ETF 1C (EUR) ISIN:LU1079842321) a sub-fund of OSSIAM LUX SICAV

Management Company: Ossiam, part of the Natixis group of companies

Objectives and Investment Policy

Investment objective

The investment objective of Ossiam Shiller Barclays CAPE® Europe Sector Value TR (the "Fund") is to replicate, before the Fund's fees and expenses, the performance of the Shiller Barclays CAPE® Europe Sector Value Net TR Index (the "Index") closing level. The Fund is passively managed.

The Index is a total return index (net dividends reinvested) expressed in EUR, sponsored by Barclays and calculated and published by Bloomberg Index Services Limited.

The Index reflects the performance of a dynamic long exposure to 4 European equity sectors which are selected every month according to their Relative CAPE® (Cyclically Adjusted Price Earnings) ratio and price variations over the prior 12 months.

Exposure to European equity sectors is achieved through MSCI Europe Sector Indices which capture large and mid-cap representation across 15 Developed European countries.

Sector constituents of the Index are selected on a monthly basis based on the Shiller Barclays CAPE® Index Family Methodology. Each of the 4 selected Sub-Indices is allocated the same weight (25%) at each rebalancing.

The anticipated level of tracking error in normal conditions is 0.50% over a one-year period.

For a detailed description of the Index, see section "Description of the Index" in the relevant Fund Appendix of the Prospectus.

Investment policy

In order to achieve its investment objective, the Fund will primarily use swaps with the objective of tracking the Index performance through synthetic replication. In that case, the Fund will invest in a portfolio of assets, the performance of which will be exchanged against the performance of the Index or a related index, or a portfolio of its constituents through swap agreements with a swap counterparty. This method implies a counterparty risk as described in the below Risk and Reward Profile.

The net asset value per share of the Fund will therefore increase (or decrease) according to the evolution of the Index. The counterparty to the swap will be a first-class financial institution that specialises in this type of transaction. The Fund may also enter into multiple swap agreements with multiple swap counterparties with the same characteristics as previously described.

The Fund shall be permanently invested for a minimum of 75% in equities or rights issued by companies having their registered office in European Economic Area, excluding Liechtenstein.

In addition, and on an ancillary basis, the Fund may use other derivatives for hedging and investment purposes as described under "Use of Derivatives, Special Investment and Hedging Techniques" in the Prospectus.

The Reference Currency of the Fund is the Euro.

The UCITS ETF 1C (EUR) shares are listed for trading on one or more stock exchanges and investors may buy or sell Shares through their usual broker on any trading day of the relevant stock exchange(s) which is also a Dealing Day in Luxembourg or, through a fund platform. Please contact your broker for additional information. The UCITS ETF 1C (EUR) Share Class is an accumulating Share Class therefore income derived from the Fund is reinvested. Please refer to the section entitled "Subscription, Transfer, Conversion and Redemption of shares" and the section entitled "Practical information" of the Fund Appendix in the Prospectus for additional information.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within less than 5 years.

Risk and Reward Profile

The Share Class is ranked 6 on the synthetic risk and reward indicator scale, which is based on historical data. Due to its exposure to equity markets, the Share Class may experience significant volatility, as expressed by its rank on the above scale. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. There is no capital guarantee or protection on the value of the Share Class. The lowest category does not mean "risk free".

Special Risk Considerations

Index Risk: The value of the Fund's Shares is linked to the Index, the value of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that the underlying methodology of the Index will indeed result in a return above any comparable investment strategy or that they will recover their initial investment.

Derivative and counterparty Risk: Funds may enter into listed and unlisted derivative contracts in order to have an exposure to underlying assets or to protect their direct assets. Payments on these contracts vary with changes of the value of the underlying assets. These contracts may cause the Funds to have a higher market exposure than they would have otherwise, which may in some cases increase losses. Unlisted contracts are agreed with a specific counterparty. If the counterparty goes into liquidation or fails or defaults on the contract the Fund could suffer a loss. Because they are not listed, these contracts can be difficult to price.

Please refer to the section entitled "General risk considerations" of the Prospectus for additional details on risks.
