

Key Information Document ("KID")

Leverage Shares plc

LS ARK Innovation Tracker ETP

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product: LS ARK Innovation Tracker ETP ("ETP Securities")
Manufacturer: Leverage Shares Plc (the "Issuer")
Product ISIN: XS2399369037
Website: <https://leverageshares.com/>
Telephone: +1 203 883-9646
Regulator: Central Bank of Ireland, Financial Conduct Authority
Document valid as at: 30 December 2022

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type: Collateralised Exchange Traded Securities.

Objectives: The objective of the LS ARK Innovation Tracker ETP is to track the ARK Innovation Tracker Investment Strategy, (the 'Investment Strategy') which is designed to provide 1:1 exposure to the performance of ARK Innovation ETF (the "Reference Asset"), minus a fee. It invests all subscription proceeds and dividends received (net of taxes) directly into Reference Assets.

The price of the ETP Securities is linked to the performance of the Reference Asset, which means that the price will rise when the price of the Reference Asset rises and fall when the price of the Reference Asset falls.

The underlying assets in respect of this product are held in the margin account (the "Margin Account") and are as follows: the Reference Assets, any cash balances and any ancillary assets (which are assets not required for investment to track the Investment Strategy and are held as cash amounts standing to the credit of the Margin Account or invested in sovereign debt in the currency of denomination of the ETP Securities with an original maturity of less than one month and minimum credit ratings) (the "Collateral Assets").

The Issuer's payment obligations in respect of the ETP Securities will be funded by liquidating the Collateral Assets.

Term: The ETP Securities are non-interest bearing and are not principal protected and you may lose some or all of your investment.

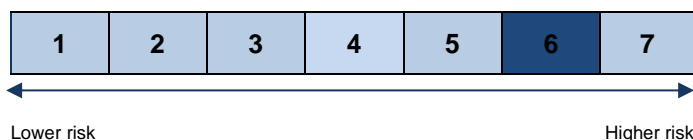

This product does not have a fixed term. The term will depend on how long you choose to hold the product, however the ETP Securities have a scheduled maturity date of 09 November 2071.

You have no right to dividends from the Reference Assets, nor are you entitled to any additional rights arising from the Reference Assets (such as voting rights).

The ETP securities may be redeemed prior to the scheduled maturity date, if: (1) the Issuer redeems all of the ETP Securities in the series following five calendar days written notice to you; (2) you elect to optionally redeem all or part of your holding in the ETP securities; (3) an event of default occurs; or (4) a mandatory redemption event occurs. A detailed description of early redemption events can be found in the prospectus in the Terms and Conditions of the ETP Securities.

Intended retail investor: The ETP securities are intended for retail investors who: (i) have specific knowledge or experience of investing in similar products and in financial markets, and have the ability to understand the product and its risks and rewards; (ii) are seeking an investment that reflects an expectation that the Reference Asset will increase in value over time, (iii) may bear a total loss of the amount invested; and (iv) have an investment horizon in line with the recommended holding period stated below.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as class 6 out of 7, which is a high risk class.

This classifies the potential volatility from future performance at a high level and poor market conditions are likely to impact the capacity for you to receive a positive return on your investment.

The risk indicator assumes you keep the product for 5 years. **The actual risk can vary significantly if you cash in at an early stage and you may get back less.** You may not be able to sell your product easily, or you may have to sell at a price that significantly impacts on how much you get back.

Be aware of currency risk. If you buy this product in a currency different than USD, the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The ETP security value depends on the Reference Asset price reacting to economic factors or falling for long periods.

The Issuer may terminate this product unilaterally, and in certain compulsory redemption events may do so on very short notice in accordance with the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of LS ARK Innovation Tracker ETP, a suitable benchmark (Invesco QQQ Trust) over the last 10 years.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period: 5 years Example Investment \$10,000 Scenarios		If you exit after 1 Year	If you exit after 5 years
Stress scenario	What might you get back after costs	USD 129	USD 55
	Average return each year	-98.71%	-64.70%
Unfavourable scenario	What might you get back after costs	USD 3055	USD 2214
	Average return each year	-69.45%	-26.03%
Moderate scenario	What might you get back after costs	USD 12002	USD 19638
	Average return each year	20.02%	14.45%
Favourable scenario	What might you get back after costs	USD 27269	USD 87181
	Average return each year	172.69%	54.20%

This table shows the money you could get back over the recommended holding period, under different scenarios, assuming that you invest \$10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment.

The stress scenario shows what you might get back in extreme market circumstances.

This type of scenario occurred for an investment, a suitable benchmark (Invesco QQQ Trust) between 2017 and 2022.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

This product cannot be easily ended. This means it is difficult to estimate how much you would get if you end it early. You will either be unable to end early or you will have to pay high costs or lose up to 100% of the investment if you do so.

What happens if Leverage Shares plc is unable to pay out?

The product is not protected by the Irish Deposit Guarantee Scheme or any other investor compensation or guarantee scheme. If we fail to make a payment when due, the trustee (Apex Corporate Trustees (UK) Limited) can enforce the security over the Collateral Assets. Once the trustee has enforced the security it can then sell the Collateral Assets and use of the proceeds of this sale to pay the amount owed to you under the ETP Securities. The proceeds of such sale may not be enough to cover all amounts owed to you under the ETP Securities and you may lose some of all of your investment.

What are the costs?

Costs over time

The person advising on or selling you about this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return).

For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10 000 is invested

The figures are estimates and may change in the future.

Investment USD 10,000	If you exit after 1 year	If you exit after 5 years
Total costs	USD 36	USD 353.48
Annual cost impact (*)	0.36%	0.36%

(*) "This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 14.50% before costs and 14.45% after costs."

Composition of costs

The table below shows:

* The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.

* What the different cost categories mean.

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee for this product.	USD 0.00
Exit costs	We do not charge an exit fee for this product.	USD 0.00
Ongoing costs taken each year		If you exit after 1 year
Management fees and other administrative or operating costs	0.35% of the value of your investment per year. This is an estimate based on actual costs over the last year.	USD 35.00
Transaction costs	0.01% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	USD 1.00
Incidental costs taken under specific conditions		If you exit after 1 year
Performance fees	There is no performance fee for this product.	USD 0.00

How long should I hold it and can I take my money out early?

Recommended minimum holding period: 5 years

Recommended holding period: 5 years.

You may trade this product on the London Stock Exchange or Euronext Amsterdam or Frankfurt Stock Exchange at your own discretion. You may choose to sell your ETP Securities prior to their maturity in accordance with your investment objectives. You should be aware that the ETP Securities may not be readily sold and the value of the ETP Securities may be substantially less than the price you paid for them.

How can I complain?
